

MEADOW HILL, INC.

Notice Hollister House Construction Update June 20, 2025

As you've seen from previous updates, the transformation of Hollister House started at the end of April. The builder has been actively working on the interior and has completed the demolition phase.

As I mentioned earlier, this is now a construction zone. For everyone's safety, please be aware of ongoing activities and maintain a safe distance when near the site.

A dumpster will be placed in the Hollister House parking area and will stay there for the foreseeable future. Most work will be done inside the house, but various contractors will need to access the area to deliver materials and work on the property. The builder has assured us he will do his best to limit activity to the immediate vicinity of Hollister House.

Construction on the garage and a patio on the south side of the property will start within the next few weeks. Some excavation equipment will be on site for a short period.

Please be patient during this process. The builder and his crew will respect residents' privacy and will try to minimize any disruption to daily routines.

If you encounter any issues, please do not engage directly with the contractors. Instead, **contact Frank Cisz at 203-494-2636**, and he will handle the matter promptly.

We appreciate your cooperation and patience during this construction phase, and we will do our best to ensure a smooth transition to a beautiful new residential unit at Meadow Hill.
